

I Mak Shatila pay for this service and therefore expect instant traffic and weather reports. I travel alot in my car, especially from San Diego to Los Angeles. Those are two of the worst places to have traffic congestion, and XM Satellite radio lets me know of the problems before I get there. The fact that I pay monthly for this service, it should not matter about anything else. I want it, I need it, they provide it for me, for a price. It is perfect business. Thank you
